Platform-wise Virality Prediction

Platform	Score	Estimated Reach	Compatibility
Instagram	91.4 / 100	401,383	60 / 100
YouTube	100 / 100	488,950	90 / 100
TikTok	88.4 / 100	395,596	60 / 100
Facebook	96.4 / 100	411,029	60 / 100

Recommendations

- No audio track was detected. Consider adding relevant audio, narration, or captions.
- A large portion of the audio is silent. Consider reducing unnecessary silence.
- No usable speech transcript was detected. Consider adding clear narration or captions if the content depends on speech.
- For a smaller creator account, focus on niche relevance and consistent audience engagement.
- Consider using a small set of relevant and specific hashtags.

This report contains automatically extracted video characteristics, audio/content analysis, platform-adjusted estimates and machine-learning prediction results.
